

# SPOTLIGHT

PRECISELY ENGINEERED. REAL-WORLD TESTED.

A high-profile healthcare facility in the Southern United States chose Corzan® CPVC pipe and fittings for its superior performance capabilities when their existing copper system experienced pinhole leaks and degradation due to corrosion.

When other materials failed, Lubrizol experts guided the project specification and successful installation of 25,000 feet of ½- to 6-inch Corzan CPVC pipe, fittings and adapters. Here's why Corzan CPVC was the material of choice:

- Corzan CPVC **innately resists corrosion and scaling**, preventing leaks to maintain water quality and ensure safe, efficient operations.
- Corzan CPVC is **plenum rated**, eliminating the need for costly modifications such as additional insulation during retrofits.
- Corzan CPVC is **immune to chlorine, chlorine dioxide, and monochloramine**, making it ideal for piping systems where copper corrosion is driven by secondary disinfection.
